EDUCATION

Savitribai Phule Pune University

Bachelor of Engineering in Computer Science — Current SGPA: 9.55/10

Pune, India

2022 – 2026

EXPERIENCE

Intern

2025 – Present

Arvillium

- Developed and maintained backend features for a Python Flask-based tender intelligence platform using PostgreSQL, SQLAlchemy, Docker, and REST APIs.
- Worked on automated tender scraping, PDF processing, AI-based tender analysis, scheduler workflows, email notifications, token monitoring, and log-based runtime reporting.
- Used Selenium, BeautifulSoup, Google Gemini API, OpenAI API, Pandas, PyMuPDF, Gunicorn, Linux, Git, Bootstrap, and Jinja to build scalable platform features.

Remote Full Stack Intern

Jan 2025 – May 2025

Greeneye Technologies Ltd, UK

- Engineered and deployed a responsive full-stack web application integrating an AI-powered chatbot for improved user interaction and accessibility.
- Worked across frontend, backend, database integration, and API-based development to support cross-platform functionality.

Chair Person

Feb 2025 – Feb 2026

ACM India, ACM PES MCOE

Pune, India

- Led 10+ technical workshops, coding events, hands-on programming sessions, and student-focused technology initiatives.
- Coordinated with teams, speakers, and participants to promote technical learning, collaboration, and community engagement.

PROJECTS

TRINETRA – AI-Powered Smart Glasses

- Built an assistive wearable system using Raspberry Pi 5, YOLOv8, OpenCV, face recognition, ultrasonic obstacle detection, and offline audio feedback.
- Enabled real-time object detection, obstacle awareness, and speech-based guidance to support safer navigation for visually impaired users.

Technologies: Python, OpenCV, YOLOv8, Raspberry Pi 5, Pi Camera V3, GPIO, HC-SR04, pytsx3, Linux

CookWise – AI-Based Indian Recipe Generator

- Developed an AI-powered recipe recommendation system that suggests Indian recipes based on available ingredients, meal type, and user preferences.
- Implemented ingredient-based filtering, recipe matching, and personalized suggestions using Python, Streamlit, Firebase, Pandas, and structured recipe data.

Technologies: Python, Streamlit, Firebase, Pandas, JSON

Disaster Resilience Platform

- Created an Android-based emergency response platform using Java and Firebase Realtime Database for instant NGO-victim communication.
- Integrated SOS alerts, real-time data updates, and Google Maps API to support faster resource allocation during disaster situations.

Technologies: Java, Android Studio, Firebase Realtime Database, Google Maps API

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, HTML, CSS, JavaScript

Backend & Databases: Flask, REST APIs, PostgreSQL, SQLAlchemy, Firebase, SQLite, MongoDB

AI/ML & Computer Vision: OpenCV, YOLOv8, Face Recognition, Edge AI, Pandas, NumPy

Automation & Tools: Selenium, BeautifulSoup, Docker, Docker Compose, Linux, Git, GitHub

Hardware & IoT: Raspberry Pi 5, Pi Camera V3, GPIO, HC-SR04 Ultrasonic Sensor

Other Skills: API Integration, PDF Processing, Log Monitoring, Background Scheduling, Parallel Processing

CERTIFICATIONS AND LICENCES

Certifications: [View all certifications and licences](#)

AWARDS AND ACHIEVEMENTS

First Prize – National Level Project Competition: Awarded for **TRINETRA**, an AI-powered smart glasses project for visually impaired users.

Honors & Awards: [View all awards and achievements](#)

EXTRACURRICULAR

Social Media Incharge – Forengers NGO: Managed digital content, awareness campaigns, and creative communication for NGO initiatives.

ACM Design Co-Lead: Contributed to event branding, design, and student community initiatives.
